Folia Biologica - Manuscript Submission Report and Authors' Declaration

Manuscript title:

Authors (listed as in the submitted manuscript):

Corresponding author (Name, address, phone and fax number, email):

Authors declare that:

Ethical rules described in the section *Instructions to Authors* (published in full version at www.Folia-Biologica.org) were followed throughout the work on the project leading to this article. Authors declare specifically that they actively looked for ways that strengthen human rights and decrease suffering of animals wherever this was possible and that the basic protocol fully complied with standards given by local ethical committees and the legal system. All authors meet the following criteria: 1) Authors are members of a team that has made substantial contributions to the conception and design of the project leading to the submitted manuscript, or participated in the acquisition of data, data analysis and interpretation of results; 2) Authors participated in writing the article, contributed to the intellectual content of the submitted manuscript; 3) All authors have approved the first submitted version of the manuscript. All authors are fully responsible for the entire content of the submitted manuscript, additional versions, and the final published version of the article. Participants who do not wish to take full responsibility for the entire article content can be listed in Acknowledgements only. No part of the submitted work was published previously nor is under consideration in another journal. Previously published work related to the manuscript content is cited in accordance with *Instructions to Authors*. Authors did their best to acknowledge the original research sources wherever this was possible and cite key original papers related to the cited content. No citations of the original research related to the article content were intentionally omitted. All supporting sources were acknowledged. Authors agree that the final galley proofs will be sent to the corresponding author, who accepts the responsibility for inserting all corrections and changes of all the authors and the consensus on the final form of the article. Authors declare that no part of the data was intentionally removed in order to keep the data seemingly more coherent and negative results were also reported. This does not apply to experiments that apparently failed for technical reasons. Authors declare that if any of them identifies problems with the paper in future, he/she will notify all co-authors and the Editor-in-Chief of Folia Biologica about this fact and clarify the situation according to *Instructions to Authors* for addenda, corrigenda and retractions. Authors declare that all of them have the right to acknowledge the institutional affiliation listed in the authors' address section and will notify the institution representatives about the publication linked to the Institution. Authors declare that any previously published material, whether or not any of them was an author of such previously published work, is specifically acknowledged to the editors of Folia Biologica and is submitted with written permission from the previous publisher to be re-published. Authors declare that structural coordinates or sequence data were deposited in appropriate public databases, and links and accession numbers are provided in the manuscript (if applicable). Authors declare that they will allow reproduction of the reported data by providing clones, antibodies and other primary material upon request at reasonable cost.
